

Coronavirus (COVID-19) tests performed in Europe as of April 8, 2020, by country

Published by [Conor Stewart](#), Apr 9, 2020

As of April 8, 2020, Germany had conducted the highest number of coronavirus (COVID-19) tests in Europe at 1,317,887. The significant test capacity in Germany has been referred to as a reason for the relatively low coronavirus mortality rate in comparison to other countries. At the latest available data, Russia and Italy had carried out approximately 910 thousand and 807 thousand tests respectively. Many European countries have been ramping up their testing programs recently in an
